

Pastel Resist Madonna - Art Project

Using oil pastels or crayons, add some color. You want to have some of the paper showing thru so it will pick up the black paint. Mix colors together if you want. Be sure to do the background. Now take some black tempera paint and paint over your design. The oil pastel or crayon will resist the paint. It will bead up. Let it dry. Add some silver and gold for a gilded effect to make the halos decorative.
